SUMMARY

Detail-oriented Data Analyst with a solid foundation in SQL, Python, Power BI, and Excel. Skilled in cleaning raw datasets, validating database integrity, and transforming complex data into clear, actionable visual reports. Possesses strong analytical problem-solving abilities and hands-on experience in building structured data projects. Eager to contribute technical proficiency and support data-driven decision-making.

SKILLS

Programming & Querying: SQL (SQL Server, MySQL, PostgreSQL), Python (Pandas, NumPy)

BI & Visualization: Power BI, Tableau, Advanced Excel (Pivot Tables, Lookup, DAX), Plotly

Analytical Competencies: Data Cleaning, Exploratory Data Analysis, KPI Reporting, Data Modeling, ETL

Data Platforms & Tools: AWS, Git, GitHub, REST APIs

Business Competencies: Operational Reporting, Stakeholder Communication, Anomaly Investigation, Metrics Definition

EXPERIENCE

Data Analyst Intern

Jan 2026 – Jun 2026

Coder Roots

Chandigarh, India

- Extracted and cleaned 1,000+ records using SQL queries to conduct structural data analysis, reducing manual reporting time by 30%.
- Built 3 interactive Power BI and Tableau dashboards tracking operational KPIs, improving routine decision-making speed across 5 business datasets.
- Applied Excel lookup functions and database validation rules to clean raw tables, increasing data processing efficiency by 25%.
- Conducted investigative SQL audits to eliminate data anomalies and operational bottlenecks, resolving 100% of assigned technical tickets.
- Standardized reporting templates across Excel and Power BI, streamlining stakeholder review workflows and reducing analysis turnaround by 20%.
- Audited relational data integrity across 5,000+ records to ensure consistent reporting standards for cross-functional teams.

PROJECTS

Healthcare Supply Chain & Inventory Analytics | *Python, SQL Server, Power BI, DAX*

- Engineered an integrated healthcare analytics workflow across 4 operational datasets covering 14.2K orders and \$3.33M in revenue.
- Carried out data profiling and SQL validation on 26,000+ records across facility consumption, stock availability, and 538 suppliers.
- Constructed a 5-page interactive Power BI dashboard tracking 97.4% inventory health and evaluating supplier on-time delivery rates.

Zepto Business Performance Dashboard | *SQL Server, Power BI, Advanced Excel*

- Analyzed 5,000 orders and 11,205 transaction records to evaluate retail purchasing behavior and operational delivery trends.
- Designed a star schema data model and optimized SQL queries across 26 dark stores, analyzing INR 37.1 Lakh in revenue performance.
- Programmed executive Power BI reports with custom DAX measures, tracking average ticket sizes and cutting status review times to 15 minutes.

Cuvoria – Smart Hospital Recommendation System | *Python, Machine Learning, Streamlit, Pandas*

- Created an automated recommendation tool mapping hospital specializations, proximity, and verified ratings across 500+ healthcare facilities.
- Implemented a hybrid ranking algorithm combining distance metrics and weighted scores, delivering top 5 prioritized medical recommendations.
- Deployed interactive mapping dashboards using Streamlit, simplifying facility discovery and reducing search time by 40%.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Data Science Professional

Career Essentials in Generative AI – Microsoft & LinkedIn

EDUCATION

Bachelor of Technology – Computer Science Engineering

2022 – 2026

Apeejay Institute of Management and Engineering Technical Campus

CGPA: 8.57 / 10
